

**ON-LINE BILLING SYSTEM  
AND METHOD OF THE SAME**

**ABSTRACT OF THE DISCLOSURE**

5           An on-line billing system and method capable of  
integrating the electronic billing and payment  
process, comprises the steps of: forwarding the file  
of check sheet details to HUBWEB interface,  
generating the file of check sheet, issuing  
10   statement of account, inquiring/deleting/printing  
the corresponding statement of account/inquiry  
invoice, restoring statement of account back to ERP,  
restoring confirmed dispute of check sheet by batch  
to HUBWEB interface, generating the file of  
15   statement of account details and generating the  
invoice file. By consolidating the details of check  
sheet from ERP and forwarding to HUBWEB, the system  
further activates HUBWEB to generate a file of check  
sheet for the procedure as inquire check sheet, mark  
20   dispute of check sheet, confirm dispute of check  
sheet and delete dispute of check sheet. Meanwhile,  
in the process to mark, confirm and delete dispute  
of check sheet, the system will initiate the  
electrical mails to notify the relevant personnel.
